**RE: DISCHARGE OF PRETREATED GROUNDWATER,
FINE ORGANICS CORPORATION**

Dear Mr. Nosil:

The revision to the Fine Organics permit dated 05/92 allowed the discharge of pretreated groundwater to the PVSC system from Hexcel Corporation by way of Fine Organics sewer line until 11/30/92. By this date Hexcel Corporation was to have installed a sewer line and obtain a NJPDES permit to discharge this groundwater after pretreatment to the navigable waters of the State of New Jersey.

We have been advised by Fine Organics that the pretreatment and discharge of this groundwater has ceased and a new sewer line has not been installed. PVSC wants to know the status of this project as of this date.

It is important to note that your company will not be permitted to discharge any of the groundwater to the sewer system. You must exercise every precaution to ascertain that this groundwater does not enter the sewer. If water collects and increases the possibility of its unauthorized discharge or causes any other environmental problem, then this groundwater must be removed through off-site disposal by a licensed hauler.
